Career

2010-11 Freelance

Software engineering, system administration, coding, GUI design.
Training with various web application : Drupal, prestashop, jquery. Missions in java (hibernate, mercurial, play framework), and netbeans.
Clients : Expedia, Thomas Cook, and small companies, institutions.

2005-08 Technical director Angenius Development

System administration, collaborative engineering, coding, strategy.
Angenius is an environmental NGO of less than 10 people, promoting collaborative solution to complex projects. I designed several collaborative systems, implemented in PHP/MySQL, conducted audits of information systems, participated in research on various technical projects.

2004-05 Freelance

Coding, free software engineering, design.
I spent a lot of time publishing, contributing, animating communities on free software projects. Also setup a wiki farm for the complex systems society, and other international organisations.
Clients : CNRS (university researchers).

2002-04 Technical Manager at Makina Corpus

Team management, strategy planning, system administration, coding.
Makina Corpus was belonging to Jipo group (around 200 consultants), specialized in consultancy for telecom companies. Makina Corpus was focused on developing software solutions, using and publishing free software. I setup the company procedures and lead the technical team, as well as creating new software and concept to address internal and clients needs. I was also in charge of technical support team for the whole group. I was reporting directly to the CEO.
Clients : Major phone company, public institutions.

1999-02 Software Development Manager at Claranet

Team management, products research, software development.
Claranet France is the french branch of Claranet group (around 200 employees), based in London. At first senior developer, designing the whole intranet system and backend tools for the technical support division, I was promoted to development manager in charge of front-end, backend, public websites of the company.
Clients : 1M users nationwide in France.

1995-98 Freelance

That was a very rich period of self-learning on new technologies, and exploring newcoming possibilities of web publishing. I have been Macintosh trainer, Webmaster, internet specialist, video producer, ergonomics advisor for big national corporations and institutions.
Clients : UNESCO, France Telecom, EDF, Universities.

1992-95 Artistic director at Creatom

Concept design, CAD, prepress production.
Creatom is a company I setup with an associate. I recruited and managed up to 6 graphic designer, and worked at design of advertisement campaigns.
Clients : advertisement companies, local institutions.
